### Domestic deliveries of hard coal and coke in 1989

Provisional annual figures indicate that total domestic deliveries of coal in the Member States of the European Community were down 1 million tonnes on the previous year at 310.8 million as against 311.8 million tonnes.

The major customers for coal were :

- coal-fired power stations, with 193.6 million tonnes of steam coal, an increase of 3.1 million tonnes and 62.3% of total deliveries (190.5 million tonnes of 61.1% in 1988) and
- coking plants, which, at 69.6 million tonnes, bought 2.1 million tonnes of coking coal less than in the previous year. Deliveries to coking plants accounted for 22.4% of the total in 1989 as opposed to 71.7 million tonnes of 23.0% in 1988.

As regards coal deliveries in the individual Member States, the following points should be noted :

- Whereas in some countries deliveries of steam coal fell by between 1 and 3.5 million tonnes owing to short-term economic factors and weather conditions (in the United Kingdom, for example they were down 3.5 million tonnes, in Denmark and Italy -0.7 million tonnes) there was a steep rise in demand in Spain (+3 million tonnes or 15.1%) and an even sharper rise in France, where the electricity industry had to rely to a greater extent on coal-fired power and bought nearly twice as much steam coal (11.1 million tonnes) as in the previous year.
- On the coking coal market, sales were on a predominantly downward trend, varying from +0.3 to -1.1 million tonnes (Spain 4.5 million tonnes (+7.1%), United Kingdom 11.3 million tonnes (-8.9%).

Coke deliveries to the iron and steel industry :

- total deliveries for the 1989 reporting year were only slightly down on the previous year's figure (47.1 million tonnes in 1989 compared with 47.8 million in 1988).
